

Saving Lives by Promoting Teenage Driver Education

## *THE ABBY MILLER FOUNDATION*

Abby Miller had everything that a 17 year old girl could possibly hope to possess. She was intelligent, beautiful, witty and charming, athletic, and loved by her family and friends.

Above all of these, her greatest possession was her ability to demonstrate compassion, caring, and kindness for those with whom she came in contact. Abby was the girl who stood up for you on the school bus when you could not stand up for yourself. She was the kind stranger who took you by the hand and introduced you to your classmates when you were the new student. She encouraged you to pursue your hopes and dreams. Her eyes, smile, and infectious giggle helped to brighten your day.

But what Abby did not possess was experience behind the wheel of a car. Late one evening, a deer, standing in the middle of a dark highway caused her to swerve and lose control of her vehicle, and subsequently she lost her life.

The goal of The Abby Miller Foundation is to enhance teen-driving education programs. It is our vision that Unionville High School and other high schools around the country will be able to instruct new drivers, through the use of driving simulators, on how to avoid and properly react to the many hazards we encounter daily on roads and highways.

The Abby Miller Foundation aims to **SAVE THE LIVES OF TEENS** by improving driver's education. Your donations can help make this dream a reality.
